## NEWS on Technical Agreements for Biocides (TAB)

October, 2022

In October 2022 ECHA released two new TAB versions for Environment and APCP (Analytical Methods, PhysicoChemical Properties and Physical Hazards (APCP)).

The Technical Agreements for Biocides (TAB) are collecting the general agreements of the Working Groups (WG) which have not yet been included in any other BPR related guidance.

Although it is generally considered as guidance and reference for applicants, it has to be noted that these WG agreements are not the official view of ECHA, nor are they legally binding.

The TABs are publicly available in the public [S-CIRCABC Interest Group](#).
