

Your Specialties, Our Expertise

Industrial Hygiene

Exposure scenario

- Specific characterisation of the risk linked to the handling of the chemical agent with CHESAR and other tools

Chemical safety Reports

- Refining approaches used in the CSR to guarantee safe use and worker protection

On-site audits

- Ensure compliance with eSDS or authorization / restriction requirements (Operating Conditions and Risk Management Measures)

On-site consulting service

- General Chemical risk management (HSE)

■ CEHTRA's industrial hygienists have decades of experience working with clients in their industrial sites and manage Environmental, Health and Safety challenges with a well balanced mix of technical expertise and practical experience. CEHTRA's track record in multi-disciplinary risk assessment and modelling applies well to real world situations involving chemical substances: ever since its creation, CEHTRA has designed and conducted EHS audits, and advised management at countless sites in virtually every sector of the chemical industry and services.
