# EU Poison Centre Notification

Annex VIII to CLP regulation was released in March 2017 to harmonise the variations between poison centre notifications among members states and the new harmonised system came into effective in January 2021 (extended from January 2020). Importers and downstream users placing hazardous mixtures (with a health and/or physical effect classification) on the EU market are to provide specific information on their mixtures to centralized EU poison centre before placing their mixture on the market.

**CEHTRA can support as a third-party representative to assist in these requirements.**

Importers and downstream users placing mixtures on the market not already notified under national legislation must comply with Annex VIII of the Regulation from the following dates:

- Hazardous mixtures for consumer and professional use: **January 1, 2021**
- Hazardous mixtures for industrial use: **January 1, 2024**
- If the mixture is already on the market and already notified to the local poison centre of the Member State, the date of compliance is **1st January 2025**.

## Key Services

### Portfolio Review

Screen your Portfolio to identify mixtures that require PCN and notification deadlines

### Review Safety data sheets and labels

Full compliance review of SDS and labels

### Prepare and submit PCN notification

Screen for full notification information and generate UFI codes

### Regulatory support

Offer regulatory advice on how best to fulfill obligations
