

Your Specialties, Our Expertise

# EU Poison Center Notification

## Portfolio Review

- Screen your Portfolio to identify mixtures that require PCN and notification deadlines

## Review Safety data sheets and labels

- Full compliance review of SDS and labels

## Prepare and submit PCN notification

- Screen for full notification information and generate UFI codes

## Regulatory support

- Offer regulatory advice on how best to fulfill obligations

■ Annex VIII to CLP regulation was released in March 2017 to harmonise the variations between poison centre notifications among members states and the new harmonised system became effective from January 2021 (extended from January 2020).

■ Importers and downstream users placing hazardous mixtures (with a health and/or physical effect classification) on the EU market are to provide specific information on your mixtures to the centralized EU poison centre before placing these mixture on the market.
