

Your Specialties, Our Expertise

REACH Authorisation

Complete authorisation dossier

- Drafting the whole dossier in coherence (CSR, AoA, SEA)

Advocacy

- Protect your interest (regulatory watch, supply chain securisation, public consultation...)

Conformity

- Toward the Authorisation or restriction obligation

Prioritisation / Anticipation

- Anticipate the regulatory obligation based on the hazard for your substance portfolio

■ REACH Authorisation is a European risk management measure which aims to limit human and environmental exposure to substances considered of very high concern. All the users in terms of REACH definition (formulators, importers, downstream users) of one of the Annex XIV substances in Europe must carry out an Authorisation dossier to continue to be able to use the substance in question.

■ CEHTRA's team is experienced and the entire dossier is done in-house, from the exposure estimation to the assessment of socio-economic impacts.

Value-added Services

All the dossier parts
are performed internally

Several dossier submitted with
success

Member of the NerSAP(Network of
REACH SEA and Analysis
of Alternatives practitioners)

Tox / Ecotox hazard assessment
based on SVHC properties

Regulatory scoring based
on the supporting information

Draft the Analysis of Alternatives
based on client's data
