

Your Specialties, Our Expertise

Global Chemicals Notification

Global Registration Strategies

- Registration schemes adapted to your needs

Scientific Expertise

- Data Gap analysis
- Testing strategy (incl. alternatives to in vivo testing)
- Scientific support

Testing Programme

- Monitor testing adapted to local requirements

Registration Dossiers

- Preparation of Country-compliant dossiers
- Communication with authorities

- When it comes to chemical regulatory compliance, there is no 'one method fits all' approach. Here at CEHTRA we have developed our own internal tools designed to provide you the best worldwide, customized, and optimized strategy for a minimum cost. Our expert practitioners have collectively decades of experience and using our PRIMO tool are able to identify the most up to date regulatory requirements for the designated target countries. We prepare the Master dossier on which all other submissions are based. When required, our partners, chosen for their geographic proximity, language, and culture have the skills to prepare your local submission dossiers.

Value-added Services

PRIMO tool to optimize management and follow-up of complex worldwide registration projects

Scientific and Regulatory expert advices
