

How about giving a **digital touch** to the safety evaluation of **your cosmetic products?**

A **CEHTRA-designed tool** dedicated to your **cosmetics safety assessment**

### What is Cosmetick ?

The concept of Cosmetick was born from the collaboration between software developers and toxicologists to facilitate the evaluation of the safety of cosmetic products, in the context of toxicological profiling.

### Cosmetick allows its users to:

- Access to hundreds of toxicological profiles and composition of raw materials
- Identify toxicological alerts and reference values such as NOAELs
- Consult dozens of literature and regulatory sources of information
- Find their CEHTRA projects and results of Margins of safety (when evaluated by CEHTRA experts)

### Three licence options \* :

Basic

Advanced Limited

Advanced Unlimited

# COSMETICK

A digital touch for your cosmetics safety assessment

## Databases INCI, impurities and Raw Materials

- ✓ Toxicological and Eco-Toxicological profiles of ingredients and impurities
- ✓ Warnings, toxicological and eco-toxicological values
- ✓ Export of the profiles

## CEHTRAPEDIA

- ✓ Link to each substance with reference data (Annexes of the Cosmetic Regulation, CLP, IARC...)
- ✓ Regular updates

## Cosmetic projects

### For the products evaluated by CEHTRA:

- ✓ Calculation of Margins of Safety (MOS) for ingredients,
- ✓ Calculation for impurities
- ✓ Conclusions
- ✓ Analysis of the impact of toxicological changes

### For the products evaluated by the user:

- ✓ Simplified creation of projects
- ✓ Table of results (MOS ingredients, calculation impurities)
- ✓ Export of the evaluation
- ✓ Analysis of the impact of toxicological changes
