- Final dossier

## Support for Issues

- Literature search, bibliography
- In vitro tests : analysis and advice
- Management of data gaps by alternative methods

■ CEHTRA has been commissioned by numerous companies including multi-nationals in the cosmetics industry to assist them with cosmetic regulation compliance.

■ CEHTRA evaluates the safety of several types of products (care, hygiene, perfumes...), and new ingredients. Cosmetick includes comprehensive databases allow us to anticipate risks for your products.

■ We can propose complementary approaches in case of data gaps (structural alerts, QSAR, Read-across). Our eco-toxicologists can contribute to the eco-conceptions of your formula.

■ At CEHTRA, we are professional partner of the Cosmetic Valley and provide different training courses on the Fundamentals of the Cosmetic Regulation, webinars on Content / Container Interactions or seminaire in University.
